

We currently have a vacancy for a junior surveyor / surveyor

Job brief

We are looking for a graduate or experienced surveyor to undertake a variety of measured survey projects for our growing business.

This role requires relevant qualifications and / or experience in the measured survey industry.

Site work often involves rough terrain, remote locations, carrying heavy equipment and, if safe to do so, continues during adverse weather.

Work regularly involves significant travel which would include staying away overnight near sites which are not local to our offices.

Typical Atlas Surveys projects

- Conducting topographical surveys using robotic total stations and GNSS
- Undertaking measured building surveys primarily using 3D laser scanners
- Hydrographical surveys of inland and coastal waters for flood modelling.
- Engineering surveys including setting-out, levelling and monitoring
- Boundary analysis surveys combining ground measurements, Ordnance Survey mapping and Land Registry Title Plans
- Computation and presentation of results using software such as N4ce, AutoCAD, Faro Scene and tabulated spreadsheets reports

Regular Duties

- Undertake site and office work for above tasks from field measurement to finished drawings
- Liaise with management, staff and clients. Collaboration with sub-contractors
- Thorough understanding of specifications, health and safety matters and quality assurance
- Supervise and train junior staff
- Highly professional attitude with regard to confidentiality, the handling of sensitive information and access to secure locations
- Maintenance and adjustment of survey equipment
- Compile survey quotations and undertake administration tasks as necessary

Requirements

- Previous experience as a surveyor in some of the listed tasks and / or qualifications in surveying (or a similar field)
- Confidence and experience with IT, including familiarity with survey processing and CAD software
- Leadership and team skills
- Trustworthy, reliable, self-motivated, hardy, organised and has attention to detail
